JOURNAL OF SOVIET MATHEMATICS
Volume 3, Numbers 1-6

Volume 3, Number 1 January, 1975

This issue is a translation of Zapiski Nauchnykh Seminarov Leningradskogo Otdeleniya Matematicheskogo Instituta im. V. A. Steklova Akademii Nauk SSSR (Notes of Scientific Seminars of the V. A. Steklov Mathematical Institute, Leningrad Branch, Academy of Sciences of the USSR), Vol. 25, 1972. The issue is entitled "Mathematical Questions of the Theory of Wave Propogation. Part 4" and is edited by V. M. Babich.

	Engl./Russ.
Systems of Linear Algebraic Equations Associated with Problems of Diffraction by Periodic Structures—B. P. Belinskii	1 5
Wave Propagation in a String with Rapidly Oscillating Parameters —A. S. Blagoveshchenskii and A. A. Buzdin	9 15
Uniform Asymptotic Expansions of Functions Associated with a Paraboloid of Revolution—N. S. Grigor'eva	39 52
High-Frequency Source between the Branches of a Hyperbola —A. P. Kiselev	62 79
Low-Frequency Lamb Waves in Cylindral and Spherical Layers in an Elastic Medium—P. V. Krauklis and L. A. Molotkov	82 101
Relationship of the General Ellipticity Property of a System of Rays to the Spectrum for a Two-Mirror Cavity—V. F. Lazutkin and N. V. Svanidze	91 111
Matrix Representations of the Dispersion Relation for Layered Elastic Media—L. A. Molotkov	95 116
Diffraction by a Smooth Interface between Two Inhomogeneous Media —I. V. Mukhina	109 132
Wave Processes in Diffraction by a Perfectly Reflecting Cone in the Axisymmetric Case—B. G. Nikolaev	125 151
Behavior of the Displacement Field behind a Plane Nonstationary Wave Front—N. V. Tsepelev	142 172
Higher-Order Approximations of the Asymptotic Solutions of the Wave Equation for a Plane Waveguide—Z. A. Yanson	146 176

Engl./Russ.

Volume 3, Number 2 February, 1975

This issue is a translation of Itogi Nauki i Tekhniki (Sovremennye Problemy Matematiki) (Progress in Science and Technology – Contemporary Problems in Mathematics, Vol. 1, 1973).

HILBERT'S TENTH PROBLEM
Yu. I. Manin

§ 1. Informal Description of the Results 161 5
§ 2. Algorithms and Recursive Functions 164 10
§ 3. Plan of the Proof 166 13
§ 4. Enumerable Sets Are Primitive-Enumerable 169 17
§ 5. Primitive-Enumerable Sets Are D-Sets 172 21
§ 6. D-Sets Are Diophantine if the Graphs of the Exponential Function, of the Factorial, and of the Binomial Coefficients Are Diophantine 173 23
§ 7. Construction of a Special Diophantine Set 176 26
§ 8. The Graph of the Exponential Function Is Diophantine 180 32
§ 9. The Graphs of the Factorial and of the Binomial Coefficients Are Diophantine 181 33
§10. Gödel's Theorem 183 35
Literature Cited 184 37

GEOMETRIC VARIATIONAL PROBLEMS
A. T. Fomenko
Introduction 185 39
§ 1. Formulation of Bernstein's Problem and of Simons' Theorem 186 40
§ 2. Integral Flows 186 42
§ 3. The Bernstein Problem for $n \leq 8$ 189 47
§ 4. Intrinsic Regularity 191 50
§ 5. The Bernstein Problem for $n \geq 9$ 192 53
§ 6. Intrinsic Regularity and Cones C_{2m-1} 194 55
Literature Cited 196 59

LAPLACE TRANSFORM OF GENERALIZED FUNCTIONS OF SLOW GROWTH
V. S. Vladimirov 198 61

THE CANONIC OPERATOR (Real Case)
V. P. Maslov and M. V. Fedoryuk
Introduction 217 85
§ 1. The Stationary Phase Method. The Legendre Transform 221 91
§ 2. λ-Pseudodifferential Operators 227 99
§ 3. The Characteristic Equation and the Bicharacteristics 232 106
§ 4. Lagrange Manifolds and Canonic Transformations 242 119
§ 5. Fourier Transform of a λ-Pseudodifferential Operator 251 130
§ 6. Precanonic Operator 254 135
§ 7. Index of a Curve on a Lagrange Manifold 262 144
§ 8. The Canonic Operator 268 153
§ 9. Asymptotic Behavior of the Eigenvalues of Self-Adjoint λ-Pseudodifferential Operators 275 162
Literature Cited 277 165

THE CANONIC OPERATOR (Complex Case)
V. P. Maslov and B. Yu. Sternin
Chapter I. The Canonic Operator 281 170
§1. Lagrange Manifolds with an Imaginary Germ 281 170
§2. Action 285 175

§3. The Jacobian and the Index 288 180
§4. The Canonic Operator 289 181
Chapter II. Invariance of the Canonic Operator. 290 182
§1. Formulations of the Fundamental Theorems 290 182
§2. Proof of Proposition 2.1 ..... 290 183
§3. Proof of Proposition 2.2 ..... 293 186
Chapter III. Commutation of the Canonic Operator and the Hamilton Operator 295 189
§1. Association of the Canonic Operator and the Hamilton Operator. Formulation of the Fundamental Theorem 295 189
§2. Some Preparatory Computations 296 190
§3. The Hamilton–Jacobi Operator 297 192
§4. The Transfer Operator 297 192
Literature Cited 299 195

Engl./Russ.

Volume 3, Number 3 March, 1975

This issue is a translation of Zapiski Nauchnykh Seminarov Leningradskogo Otdeleniya Matematicheskogo Instituta im. V. A. Steklova Akademii Nauk USSR (Notes of Scientific Seminars of the V. A. Steklov Mathematical Institute, Leningrad Branch, Academy of Sciences of the USSR), Vol. 26, 1972. The issue is entitled "Investigations on the Classical Problems of the Theory of Probability and Mathematical Statistics. II."

Special Functions and the Limit Properties of Probability Distributions. II —V. M. Kalinin 301 5

As a Criterion of Independence in a Contingency Table—V. M. Kalinin and O. V. Shalaevskii 360 88

As a Criterion of Homogeneity—V. M. Kalinin and O. V. Shalaevskii 381 118

Engl./Russ.

Volume 3, Number 4 April, 1975

This issue is a translation of Zapiski Nauchnykh Seminarov Leningradskogo Otdeleniya Matematicheskogo Instituta im. V. A. Steklova AN SSSR (Notes of Scientific Seminars of the V. A. Steklov Mathematical Institute, Leningrad Branch, Academy of Sciences of the USSR), Vol. 27, 1972.

Mapping of Affine Spaces with Systems of Cones – A. D. Aleksandrov	387	7
D. Ludwig's Method and the Boundary-Layer Method in the Problem of Diffraction by a Smooth Body – V. M. Babich	395	17
Remarks on the Spectral Shift Function – M. Sh. Birman and M. Z. Solomyak	408	33
Trace Formulas for Multichannel Problems – V. S. Buslaev	420	47
K-Dimensional Directions Singular for a Convex Body F in R^n – V. A. Zalgaller	437	67
Maximum Growth of the Coefficients of Quasilinear Elliptic Equations – A. V. Ivanov	442	73
A Dynamical System Generated by the Navier–Stokes Equation – O. A. Ladyzhenskaya	458	91
Removable Singularities of Bounded Solutions of Quasilinear Elliptic Equations of Any Order – V. G. Maz'ya	480	116
Singularities of the Solution of the Navier–Stokes Equations at Corners – L. A. Oganesyan	493	131
Solvability in the Large of the First Boundary-Value Problem for a Quasilinear Third-Order System Pertaining to the Motion of a Viscous Liquid – A. P. Oskolkov	508	145
Scattering Theory and Automorphic Functions – B. S. Pavlov and L. D. Faddeev	522	161
Inequalities for Functions of the Classes $\vec{W}_p(R^n)$ – V. A. Solonnikov	549	194
Regularity of the Solutions of Variational Inequalities – N. N. Ural'tseva	565	211
A Stability Theorem for a Linear Hamiltonian System with Periodic Coefficients – V. A. Yakubovich	574	220

Engl./Russ.

Volume 3, Number 5 May, 1975

This issue is a translation of Zapiski Nauchnykh Seminarov Leningradskogo Otdeleniya Matematicheskogo Instituta im. V. A. Steklova Akademii Nauk SSSR (Notes of Scientific Seminars of the V. A. Steklov Mathematical Institute, Leningrad Branch, Academy of Sciences of the USSR), Vol. 28, 1972. The issue is entitled "Investigations on Representation Theory" and is edited by D. K. Faddeev.

Representations of Partially Ordered Sets—L. A. Nazarova and A. V. Roiter	585	5
Partially Ordered Sets of Finite Type—M. M. Kleiner	607	32
On the Exact Representations of Partially Ordered Sets of Finite Type—M. M. Kleiner	616	42
Representations of Algebras the Square of Whose Radical Equals Zero—S. A. Kruglyak	629	60
Application of Modules over a Dyad for the Classification of Finite p-Groups Possessing an Abelian Subgroup of Index p and of Pairs of Mutually Annihilating Operators—L. A. Nazarova, A. V. Roiter, V. V. Sergeichuk, and V. M. Bondarenko	636	69
Classification of 2-Adic Representations of an Eighth-Order Cyclic Group—A. V. Yakovlev	654	93
Matrix Problems and Representations of Bisystems—A. V. Roiter	681	130
Matrix Problems and Categories of Matrices—Yu. A. Drozd	692	144
On the Finiteness of Type of a Semigroup Algebra of a Finite Fully Prime Semigroup—I. S. Ponizovskii	700	154
Homological Interpretation of the Resultant of Two Polynomials—D. K. Faddeev	710	164

Engl./Russ.

Volume 3, Number 6 June, 1975

This issue is a translation of Zapiski Nauchnykh Seminarov Leningradskogo Otdeleniya Matematicheskogo Instituta im. V. A. Steklova AN SSSR (Notes of Scientific Seminars of the V. A. Steklov Mathematical Institute, Leningrad Branch, Academy of Sciences of the USSR), Vol. 29, 1972. This issue is entitled "Problems in the Theory of Probability Distributions" and is edited by V. N. Sudakov.

Properties of Minimal First-Entrance Sampling Plans for Multinomial Processes—Yu. V. Linnik and I. V. Romanovskii	711	3
Linear Extrapolation of a Homogeneous Random Field—O. A. Orevkova	716	9
Remark on a Theorem of V. S. Mikhalevich—B. N. Pribysh and V. N. Sudakov	721	14
Unit-Time Average of the Quantity of Information Contained in one Stationary Gaussian Process about Another—V. N. Solev	725	18
An Absolute Regularity Condition for Fields—V. N. Solev	733	27
Random Time Substitution and Continuous Semi-Markov Processes—B. P. Kharlamov	736	30
Point Processes with a Conditionally Independent Uniform Distribution of Points on Intervals—B. P. Kharlamov	743	38
A Spectral Estimator for Certain Stationary Random Processes—T. V. Khachaturova	747	42
Characterization of the Normal Law by the Property of Stochastic Independence of the Sample Mean and the First Central Moment for the Sample—Yu. V. Borovskikh	755	51
Admissibility of Pitman Estimators for a Location Parameter—I. A. Ibragimov and R. Z. Khas'minskii	761	57
Bayes Formulation of the Location Parameter Estimation Problem—A. M. Kagan and Yu. N. Karpov	766	62
Estimation of a Rotation Parameter on a Sphere—A. I. Rukhin	777	74
Marginal Sufficiency of Statistics—V. N. Sudakov	792	92
ε-Minimax Character of Hotelling's T^2 Test for Almost-Normal Distributions—L. A. Khalfin and N. M. Khalfina	801	102
Measures on Subsets of Direct Products—V. N. Sudakov	812	113
Existence of Doubly Stochastic Densities—V. N. Sudakov	825	129
Geometrical State Theory, the Von Neumann Boundary, and Duality of the C*-Algebras—A. M. Vershik	840	147

GROUP RINGS		
A. E. Zalesskii and A. V. Mikhalev		
Introduction	1	5
Fundamental Notation	2	6
Chapter 1. Properties of Elements and of Ideals of Group Rings	3	8
§1. Initial Information of Group Rings	3	8
§2. Singular Elements in Group Rings	7	15
§3. Lattice Mappings	18	30
§4. Fundamental Ideal	20	34
§5. Nilpotent Ideals and Nilideals of Group Rings	24	39
§6. Quasiregular Ideals and Jacobson Radical of a Group Ring. Semisimple Group Rings	26	43
§7. Group Rings of Nilpotent and Solvable Groups	32	51
§8. Group Rings of Free Groups	34	55
§9. Isomorphisms and Automorphisms of Group Rings	36	58
Chapter 2. Ring Properties of Group Rings	40	64
§10. Regular Group Rings	40	64
§11. Noetherian Group Rings	40	65
§12. Complete Reducibility of Group Rings	42	67
§13. Primary and Semiprimary Group Rings	42	67
§14. A .in, Perfect, and Semiperfect Group Rings	43	68
§15. Self-Injective and Near-Self-Injective Group Rings	44	70
§16. Local and Semilocal Group Rings. Localization of Group Rings	45	72
§17. Group Rings with a Polynomial Identity	47	75
§18. Homological Dimensions of Groups and Group Rings	49	78
§19. Miscellany	51	81
Chapter 3. Representations of Infinite Groups	52	83
§20. Regular Modules. Induced and Primitive Modules	52	83
§21. Tensor Products	54	86
§22. Primitive Ideals of Group Rings	55	88
§23. Infinite-Dimensional Representations of Groups	58	92
§24. Varieties of Representations	61	97
Literature Cited	63	101
ON THE BRAVAIS TYPES OF LATTICES		
B. N. Delone, R. V. Galiulin, and M. I. Shtogrin		
Part I. 3-Dimensional lattices	79	120
Chapter 1. Geometric Derivation of Bravais' Results	79	120
§1. Motions. Transformations of Symmetry	79	120

§2. Certain Information on Lattices	80	121
§3. Primitivity Theorem for a Parallelepiped Constructed on the Three Successive Minima of a Lattice	82	124
§4. Some Lemmas on the Symmetry Elements of a Lattice	83	125
§5. Derivation of Seven Holohedra	84	128
§6. 14 Bravais Types of Lattices	86	132
Chapter 2. Derivation of Holohedra and of the Bravais Types of Lattices with the Aid of a Dirichlet Domain	89	136
§1. Dirichlet Domains. Dirichlet Partitioning	89	136
§2. Derivation of Five Types of Three-Dimensional Dirichlet Parallelohedra by the Method of Layers	90	137
§3. Characteristic Parallelepipeds	92	141
§4. Derivation of 14 Bravais Parallelepipeds	94	144
Chapter 3. Reduction Theory and Sorts of Lattices	95	146
§1. The Reduction Problem and Historical Information	95	146
§2. Lagrange-Reduction of a Two-Dimensional Lattice and Seeber-Reduction of a Three-Dimensional Lattice	96	148
§3. Selling Parameters. Delone Symbol	98	153
§4. Reduced Quadrilateral	99	155
§5. Algorithm for Selling Reduction on the Delone Symbol	102	159
§6. Geometric Meaning of the Reduced Selling Parameters	103	161
§7. Reduction to a Frame Constructed on the Three Successive Minima of a Lattice	104	163
§8. Sorts of Lattices	106	166
§9. Necessary and Sufficient Conditions Imposed on Reduced Parameters in Order that a Lattice Belong to One or Another of the 24 Sorts	107	168
§10. Determination of Expressions for the Bravais Frame Vectors in Terms of the Vectors of the Original Base Frame of the Lattice	108	171
§11. Uniqueness of the Choice of the Frame on the Three Successive Minima	110	174
Chapter 4. Bravais Types of Lattices and Complete Groups of Motions	112	177
§1. The Giving of Motions, Matching Lattices with Themselves, by the Parentheses (g, t)	112	177
§2. Two Theorems on the Isomorphism of Complete Groups of Motions Matching Lattices with Themselves	112	178
§3. On the Coincidence of the Bravais Classification of Lattices into 14 Types with the Abstract Classification of Complete Groups of the Matchings of Lattices with Themselves	113	180
Part II. n-Dimensional Investigation of n-Dimensional Lattices	115	182
Chapter 5. Quadratic Forms, n-Dimensional Lattices, and Finite Groups of Integral Matrices	115	182
§1. Metric Matrix of a Frame	115	182
§2. One-to-One Correspondence between the Metrics of Frames and Positive Quadratic Forms	116	184
§3. Contiguity Vectors. The Korkin–Zolotarev Inequality	117	185
§4. Fundamental Theorem on an Adjusted Frame	118	187
§5. Mashke's Theorem	118	189
§6. Jordan's Theorem	119	189
Chapter 6. Connection of Finite Groups of Integral Matrices with the Bravais Types of Lattices. Geometric Holohedra	119	190
§1. Bieberbach's Second Theorem	119	190
§2. Bravais Types of Lattices. Bravais Classes. Crystallographic Systems	120	192
§3. On Geometric Holohedra	122	194
§4. On the Derivation of the Bravais Types of Lattices with the Aid of Centerings	123	196
§5. On Enantimorphic Lattices	125	199

Part III. N-Dimensional Method in the Investigation of n-Dimensional Lattices	126	201
Chapter 7. Parameter Space of Positive Quadratic Forms	126	201
§1. Cone K of Positive Quadratic Forms	126	201
§2. Discriminant Surface	126	202
§3. Equivalence Group {G} of Cone K	127	203
§4. Reduction Theory	128	205
§5. Disposition of the 24 Sorts of 3-Dimensional Lattices in the Closure of the Voronoi Reduction Domain	130	209
Chapter 8. Bravais Manifolds	134	216
§1. On Bravais Manifolds and Their Reduced Parts	134	216
§2. Connection of Bravais Manifolds with Arithmetic Holohedra and with Crystallographic Systems	135	218
§3. Derivation of Bravais Types of Four-Dimensional Lattices, Given by Wondratschek, Bülow, and Neubüser	136	220
§4. Reduction in a Bravais Manifold	137	222
Chapter 9. Perfect Voronoi Polytope and Its Application	140	226
§1. Perfect Lattices	140	226
§2. Assignment of a Quadratic Form to a Plane	140	227
§3. Voronoi Polytope	141	229
§4. Finiteness of the Number of Nonequivalent Faces of a Voronoi Polytope	142	230
§5. Determination of All the Nonequivalent (N-1)-Dimensional Faces of a Voronoi Polytope by the Hermite Principle	142	231
§6. On the Voronoi Reduction with Respect to Perfect Forms	143	233
§7. Application of the Voronoi Polytope in the Theory of Finite Groups of n-Dimensional Integral Matrices	145	235
Chapter 10. Application of Absolute Reduction to the Search for the Bravais Types of n-Dimensional Lattices	146	237
§1. Absolutization of Reduction	146	237
§2. Algorithm for Seeking the n-Dimensional Bravais Types with the Aid of Absolute Faces	147	240
§3. N-Dimensional Derivation of the Bravais Types of Three-Dimensional Lattices	149	242
§4. Absolutized Voronoi Reduction Domain for n = 3	154	251
Literature Cited	155	252

MEROMORPHIC FUNCTIONS
A. A. Gol'dberg

Introduction 157 5
1. Books Reviewed in the Survey 158 6
2. The Main Theorems of Nevanlinna; Characteristics for a Function and Its Derivative 158 7
3. The Theory of Ahlfors 161 13
4. The Set of Deficient Values; Inverse Problem for Value Distribution Theory .. 162 15
5. The Set of Valiron Deficient Values 163 17
6. Deficiencies for Functions of Finite Lower Order 164 18
7. Value Distributions and Asymptotic Properties of Meromorphic Functions of Lower Order Less than One 166 21
8. Meromorphic Functions of Order Zero 167 24
9. Meromorphic Functions Representable by Series of Simple Fractions 168 25
10. Uniqueness Theorems 168 26
11. Multiple Values 169 27
12. The Paley Conjecture and Exceptional Values in the Petrenko Sense 170 28
13. Picard and Borel Exceptional Values and Their Generalizations; Picard Sets .. 170 30
14. Stability of Deficiencies 171 31
15. Asymptotic Values 172 32
16. Lines of Julia and Borel; Cercles de Remplissage 173 35
17. Classes of Functions Characterized by Constraints on the Arguments of a-Points 174 37
18. Compositions, Iterates, Fixpoints, Functional Equations, and Identities 178 43
19. Entire Functions with Prescribed Asymptotic Behavior; Asymptotic Stability 180 46
20. Representations of Meromorphic Functions 180 47
21. The Spherical Derivative 181 48

[THE BOUNDARY BEHAVIOR OF ANALYTIC FUNCTIONS
A. J. Lohwater 99]

NOTE

The Table of Contents lists all material that appeared in the original Russian journal. Items originally published in English or generally available in the West are not included in the translation and are shown in brackets. Whenever possible, the English-language source containing the omitted items is given.

Volume 4, Number 3 September, 1975

This issue is a translation of Itogi Nauki i Tekhniki. Teoriya Veroyatnostei. Matematicheskaya Statistika. Teoreticheskaya Kibernetika (Progress in Science and Technology. Theory of Probability. Mathematical Statistics. Theoretical Cybernetics), Vol. 11 (1974).

	Engl./Russ.	
COMBINATORIAL PROBLEMS OF PROBABILITY THEORY		
V. F. Kolchin and V. P. Chistyakov		
Introduction	217	5
Chapter 1. The Classical Distribution Problem	218	7
§ 1. Generating Functions and Moments	218	7
§ 2. Limit Theorems for the Number of Empty Cells in the Equiprobable Scheme	220	9
§ 3. Limit Theorems for μ_r in the Equiprobable Scheme	221	11
§ 4. Problems of Successive Occupancy in the Equiprobable Scheme	222	14
§ 5. Order Statistics in the Equiprobable Scheme	223	15
§ 6. Limit Theorems in the Polynomial Scheme	224	17
§ 7. Linear Functions of μ_r, Statistical Criteria, and Some Applications	226	19
§ 8. Other Problems	227	21
Chapter 2. Generalization of Distribution Schemes	227	22
§ 1. A Scheme of Distributing Sets of Particles	227	22
§ 2. Random Matrices	228	22
§ 3. Equiprobable Distribution with a Random Number of Particles	228	24
§ 4. Markov Distributions	229	24
Chapter 3. Random Mappings of Finite Sets	230	25
§ 1. The Class of all Mappings	230	26
§ 2. Restricted Classes of Mappings	231	28
§ 3. Random Permutations	232	29
§ 4. Another Generalization of the Problem on the Distribution of Particles and Random Mappings	234	32
§ 5. Random Mappings and Partitions of Finite Sets	235	35
Literature Cited	238	38
SEMI-MARKOV PROCESSES AND THEIR APPLICATIONS		
V. S. Korolyuk, S. M. Brodi, and A. F. Turbin		
Chapter 1. Semi-Markov Processes	244	47
Introduction	244	47
§ 1. Definition of a Semi-Markov Process	244	48
§ 2. Markov Renewal Equations	249	55
§ 3. Semi-Markov Matrices and Markov Renewal Functions	252	58
§ 4. Limiting Behavior of a SMP	254	61
§ 5. Limit Theorems for SMP in a Series Scheme	257	66
Chapter 2. Applications of Semi-Markov Processes	260	69
§ 6. Application of Semi-Markov Processes in the Theory of Bulk Servicing	260	70
§ 7. Application of Semi-Markov Processes in Reliability Theory	267	80
§ 8. Controllable Semi-Markov Processes	270	84
Literature Cited	271	85
RENEWAL THEORY		
B. A. Sevast'yanov		
Introduction	281	99
Chapter 1. Classical Renewal Processes	281	100
§ 1. Basic Concepts of Classical Renewal Theory	281	100

§ 2. The Renewal Equation	283	102
§ 3. The Poisson Renewal Process	285	105
§ 4. Asymptotic Properties of Renewal Processes	285	106
§ 5. Limit Theorems	287	109
§ 6. Other Problems	288	110
Chapter 2. Some Generalizations of Classical Renewal Theory	290	112
§ 1. Renewal Processes with Infinite Mathematical Expectation	290	112
§ 2. Renewal Processes with Not Necessarily Positive ξ_i	291	114
§ 3. Renewal Processes with ξ_i Not Identically Distributed	292	115
§ 4. Renewal Processes with Dependent ξ_i	293	116
§ 5. Other Problems	293	117
Chapter 3. Multidimensional Generalizations of Renewal Theory	294	118
§ 1. Multidimensional Renewal Equations	294	118
§ 2. Renewal in Multidimensional Space	295	119
§ 3. Other Problems	296	121
Literature Cited	297	122

Volume 4, Number 4 October, 1975

This issue is a translation of Zapiski Nauchnykh Seminarov Leningradskogo Otdeleniya Matematicheskogo Instituta im. V. A. Steklova AN SSSR (Notes of Scientific Seminars of the V. A. Steklov Mathematical Institute, Leningrad Branch, Academy of Sciences of the USSR), Vol. 30, 1972. This issue is entitled "Studies on Linear Operators and Function Theory. III," and was edited by N. K. Nikol'skii.

	Engl./Russ.
Interpolation of Power Series Uniformly Convergent in the Unit Disk —S. A. Vinogradov	303 5
Factorization of Absolutely Convergent Taylor Series and Fourier Integrals —V. P. Gurarii	313 15
An Operator Calculus Based on the Cauchy–Green Formula—E. M. Dyn'kin	329 33
Local Estimates for the First Derivatives of Solutions of Quasi-Linear Second-Order Elliptic Equations and Their Application to Liouville-Type Theorems—A. V. Ivanov	335 40
Function Spaces $\mathcal{L}^{\lambda,a;b}_{r,p,\theta}(G)$—V. P. Il'in	345 51
Beurling's Theorem on a Minimum Principle for Positive Harmonic Functions —V. G. Maz'ya	367 76
Approximation in the Mean by Harmonic Functions—V. G. Maz'ya and V. P. Khavin	380 91
A Weak-Invertible Criterion in Spaces of Analytic Functions Separable by Growth Constraints—N. K. Nikol'skii	393 106
Isometric Operators in L^p Spaces of Analytic and Harmonic Functions —A. I. Plotkin	413 130
Example of a Lipschitz Function of Self-Adjoint Operators That Gives a Nonnuclear Increment under a Nuclear Perturbation—Yu. B. Farforovskaya	426 146
BRIEF COMMUNICATIONS	
Zeros of Analytic Functions with a Derivative in H^1—S. A. Vinogradov and N. A. Shirokov	434 154
Growth of an Analytic Function near Its Set of Singular Points—E. M. Dyn'kin	438 158
Quasilinear Elliptic Equations of Generalized Genus g—A. V. Ivanov	441 161
Remark of Canonic Factorization in Certain Analytic Function Spaces —V. É. Katsnel'son	444 163
Embedding of Free Boolean Algebras in Complete Boolean Algebras —S. V. Kislyakov	446 165
Interpolation of Analytic Functions Smooth to the Boundary—A. M. Kotochigov	448 167

Engl./Russ.

Sharpness of a Particular Uniqueness Theorem—B. S. Pavlov and M. G. Suturin. 450 170

Algebra of Analytic Functions Continuous on a Sphere with a Perfect Set of Singularities, and Polynomial Approximation on Dense Compacta in C^n —V. N. Senichkin 452 172

Differential Properties of the Weak Solutions of Quasilinear Elliptic Equations —V. A. Solonnikov 454 174

Paley Singularities of Power Series—S. V. Khrushev 456 176

Generalization of the Littlewood—Paley Theorem—N. A. Shirokov 460 179

Volume 4, Number 5 November, 1975

This issue is a translation of Itogi Nauk i Tekhniki (Algebra. Topologiya. Geometriya) (Progress in Science and Technology – Algebra. Topology. Geometry, Vol. 11, 1974).

	Engl.	Russ.
ALGEBRAIC GROUPS		
V. P. Platonov		
Introduction	463	5
Part 1. Structural Theory of Algebraic Groups	463	6
1.1. Structure of Algebraic Groups over a Universal Field	463	6
1.2. Classification of Algebraic Groups over a Universal Field	464	7
1.3. Algebraic Groups over Nonclosed Fields	464	8
1.4. Classification of Semisimple Algebraic Groups over Nonclosed Fields	465	9
1.5. Questions of Rationality	466	11
1.6. Algebraic Groups over Local Fields	467	12
1.7. Automorphisms and Homomorphisms of Algebraic Groups	467	13
1.8. Representations of Algebraic Groups	468	15
1.9. Algebraic Groups of Transformations	468	15
1.10. Applications of Algebraic Groups to Abstract Groups	469	16
1.11. Other Questions	469	17
Part 2. Arithmetic Theory of Algebraic Groups	469	17
2.0. Sources and Theme of the Theory	469	17
2.1. Arithmetic Groups	469	18
2.2. Adele Groups	470	19
2.3. Tamagawa Numbers	470	19
2.4. Approximations in Algebraic Groups	471	20
2.5. The Congruence-Problem	471	22
2.6. Classification of Maximal Arithmetic Groups	472	23
2.7. The Genus Problem in Arithmetic Groups	473	24
2.8. Cohomologies of Arithmetic Groups	473	25
2.9. Galois Cohomologies and the Hasse Principle	474	26
2.10. Other Questions	474	27
Literature Cited	475	28
LIE GROUPS AND HOMOGENEOUS SPACES		
D. V. Alekseevskii		
§ 1. Structure of Lie Groups and Lie Algebras	483	38
§ 2. Continuous Subgroups of Lie Groups	488	46
§ 3. Discrete Subgroups of Lie Groups	490	50
§ 4. Deformations and Contractions of Lie Algebras	494	57
§ 5. Finite-Dimensional Representation of Lie Groups and Algebras	497	61
§ 6. Lie Transformation Groups	499	65
§ 7. Geometry of Homogeneous Spaces	503	72
§ 8. Homogeneous Vector Bundles and Invariant Differential Operators on Homogeneous Spaces	507	80
§ 9. Topology of Lie Groups and of Homogeneous Spaces	508	81
§10. Generalizations of Lie Groups	510	85
§11. Certain Applications of Lie Groups	514	92
Literature Cited	515	93
STEIN SPACES		
A. L. Onishchik		
§1. Preliminary Concepts	540	125

Engl./Russ.

§2. Coherent Analytic Sheaves on Stein Spaces and Their Cohomologies 542 129
§3. Topological Properties of Stein Spaces 544 134
§4. Imbeddings and Immersions in C^N 545 136
§5. The Levi Problem 546 137
§6. Oka's Principle and Holomorphic Bundles over Stein Spaces 548 142
Literature Cited 550 146

STRUCTURES ON DIFFERENTIABLE MANIFOLDS
A. P. Shirokov
§ 1. Researches on G-Structure Theory 555 153
§ 2. Structures Definable by the Giving of Tensor Fields and of Distributions 556 156
§ 3. Almost-Product Structures 558 159
§ 4. Riemannian Bundles 559 161
§ 5. Almost-Contact Structures 561 163
§ 6. f-Structures and Their Generalizations 565 172
§ 7. Tangent Bundles and Structures Connected with Them 567 176
§ 8. Symplectic Structures and Structures Related with Them 569 179
§ 9. Certain Other Structures 570 180
§10. Structures Definable by Algebras 571 182
Literature Cited 572 185

GEOMETRY OF DIFFERENTIAL EQUATIONS
V. I. Bliznikas and Z. Yu. Lupeikis
Introduction 591 209
§1. Fibered Space $J^p(V_m, V_n)$ 595 217
§2. Geometry of Systems of Ordinary Differential Equations 598 221
§3. Geometry of Systems of Partial Differential Equations 601 226
§4. On the Global Geometry of Differential Equation Systems 611 243
Literature Cited 614 247

Volume 4, Number 6 December, 1975

This issue is a translation of Itogi Nauki i Tekhniki. Matematicheskii Analiz (Progress in Science and Technology. Mathematical Analysis), Vol. 11, 1973.

	Engl./Russ.
CONVEX SETS, EXTREME POINTS, AND SIMPLEXES	
Yu. A. Shashkin	
1. Theorems of the Krein–Mil'man Type	626 6
2. Integral Representation Theorems	627 9
3. Simplexes	629 13
4. Faces and Facial Topologies	633 21
5. Miscellany	637 27
Literature Cited	638 30
REPRESENTATIONS OF COMPLEX SEMISIMPLE LIE GROUPS	
D. P. Zhelobenko	
1. Introduction	656 51
2. Elementary G-Modules	658 55
3. Introduction to the Theory of Characters	661 60
4. Elementary G-Modules (Continued)	663 64
5. Analog of the Plancherel Formula	665 68
6. Analogs of the Paley–Wiener Theorems	667 71
7. Classification of Irreducible Representations	668 73
8. Special Problems	670 77
Literature Cited	671 79
APPROXIMATION METHODS FOR THE UNCONSTRAINED OPTIMIZATION OF FUNCTIONS OF SEVERAL VARIABLES	
V. K. Saul'ev and I. I. Samoilova	
Part I	681 91
Part II	684 96
Method of Steepest Descent	684 96
Method of Conjugate Gradients	684 96
Generalized Newton Method	686 99
Variable-Metric Method	687 100
Direct-Search Methods	688 103
Random-Search Methods	692 110
Literature Cited	694 113
LINEAR AND NONLINEAR ILL-POSED PROBLEMS	
V. A. Morozov	
Introduction	706 129
1. Well-Posed Mathematical Problems	706 129
2. The Methods of Lavrent'ev for the Approximate Solution of Tikhonov Well-Posed Problems	708 132
3. Ivanov's Method of Quasi Solutions	709 134
4. Tikhonov's Regularization Method	711 137
5. Principle of the Residual	717 148
6. Stable Computation of the Values of an Unbounded Operator; Summation of Series	719 151
7. Interrelationship of Variational Methods for the Solution of Unstable Problems.	721 154
8. Methods for the Solution of Unstable Extremal Problems	721 155
9. Theory of the Error of Approximate Solutions and Optimization of Regularization Methods for Ill-Posed Problems	723 158

10. Statistical Methods for the Solution of Ill-Posed Problems 724 160
11. The Method of Quasi Reversibility 726 164
12. Conclusion 728 166
Literature Cited 728 167
